Notes:

- 1) PEC's cost billed to members is based on the pass-through of actual cost to purchase energy, access the ERCOT transmission grid, and costs associated with providing services to the membership including, but not limited to, billing, metering, collections, customer service, maintenance and operations of distribution infrastructure, and other related costs. PEC cost assumes an annualized TCOS rate as of March 1, 2026. Texas and national averages as of January 2026.
- 2) Source of U.S. EIA information is Form EIA-861M, Monthly Electric Power Industry Report, Table 5.6A - Average Price of Electricity to Ultimate Customers by End-Use Sector.
- 3) Total cost to purchase energy is estimated from the cost per kWh multiplied by the total energy purchased at 1,000; 1,250; 1,500; and 2,000 kWh.
